

OASIS PLUS OZONE MACHINE

Please feel free to call if you have any questions not covered in this document. (952) 944-8040
This document also available for download at www.a-zrental.com

READ ALL INSTRUCTIONS BEFORE OPERATING **OZONE IS A POWERFUL OXIDIZER AND MUST BE USED WITH CARE**

WARNING: USE IN UNINHABITED AREAS ONLY.

Ozone attacks organic matter. Limited exposure can cause irritation to eyes, throat, and nose, and may cause nausea. **Do not re-inhabit a treated area until it has been well ventilated.** Prolonged exposure can also affect certain organic materials such as rubber, plastic, and wire insulation. **Do not get the machine wet.**

OZONE ACTUALLY SEEKS OUT AND DESTROYS THE BACTERIA AND MOLECULES THAT CAUSE ODORS

Not a simple cover-up or ionizer, the Oasis Plus unit is an economical environmental odor neutralizer that actually destroys the source of the odor and leaves pure, fresh oxygen in its place. This large capacity ozone generator is ideal for commercial use. It is excellent for removing odors from smoke damage, mold, mildew, pet and other sources commonly encountered in building maintenance and refurbishing.

The Oasis Plus will eliminate odor in any indoor location, including basements, kitchens, bathrooms, and more. It also provides rapid deodorizing for hotel/motel rooms, meeting rooms, and used cars, boats, and RVs.

NOTE: Ozone treatment should be the final step in cleaning or restoration.

NOTE: Do not allow people, pets, or plants back into the treated area until it has been well ventilated and the smell of ozone has dissipated.

OPERATION:

NOTE: Ozone is a toxic gas. Follow all safety precautions.

1. Make certain all people, pets, and plants are out of area. Close all windows and doors.
2. Make sure the filter in front of the cooling fan is installed and is clean.
3. Place the Oasis Plus unit on a shelf or tabletop as high as possible in the area to be treated.
4. Plug the power cord into a grounded, 3-prong outlet.
5. Set the timer to the desired length of time. Momentarily pressing the UP timer button for one second will increase the time setting by one minute at a time. Hold the button for 1-3 seconds to change the time value by two minutes per second. Hold the button for longer than 3 seconds and the time setting will change in 20-minute increments. The maximum time setting 29:59 hours. After reaching the maximum time, the timer will wrap back to 00:00 and then continue increasing. When the time is being decreased and reaches 00:00, it will wrap to 29:59 and continue decreasing.
6. Select the desired power level: 25%, 50%, 75%, or 100%. The Oasis Plus always defaults to 100% when you plug it in. When the output level is set to 100%, the machine makes ozone continuously until the timer runs out or the OFF button is pressed. At other power level settings, the machine will produce ozone for the fraction of a minute the level is set at. For example, if the output level is set to 75%, the machine will produce ozone for 75%(45

seconds) of each minute. On any setting other than 100%, the ozone generator will be cycling the ozone ON and OFF.

7. Turn the unit on by pressing the ON button. Leave the area.
8. When treatment is complete, unplug the ozone machine and ventilate the area completely until all smell of ozone is gone. Do NOT allow people, pets, or plants back into the area until all smell of ozone is dissipated.

TIME GUIDELINES:

This Oasis Plus unit will control biological contamination and odor in areas up to 40,000 cubic feet. Use the following times as a guideline.

Hotel/motel room 20-60 minutes

Fire & flood restoration 12-72 hours

NOTE: Ozone destroys odor-causing molecules, thus eliminating the source of the odor. The length of time this process takes will vary depending on the amount of contaminants the ozone has to work on, the amount of area being treated, temperature, and humidity, the amount and type of furniture in the area, etc.

NOTE: The process can produce a haze in the treatment area.

FEATURES AND SPECIFICATIONS

- DESTROYS THE SOURCE OF THE ODOR; not just a cover-up or ionizer
- REMOVES ODORS caused by smoke, pets, mold, mildew, etc.
- 30 HOUR DIGITAL TIMER/PROGRAMMER
- VARIABLE OZONE OUTPUT SETTINGS
- HIGH DENSITY ceramic and stainless steel electrodes
- POWER SUPPLY OVERLOAD PROTECTION
